# *Why Pay Someone Else To Manage Your Retirement?*

## *Proven Secrets To Wealth*

The National Commission on Retirement has forecasted that by 2040 the average retirement will last 17.4 years, a full three years longer than today. In addition to this, if inflation continues to increase as it has historically (2-3% annually), we can be assured of ever decreasing purchasing power in the future. These factors, combined with the serious inadequacies of Social Security, mean that we have an atmosphere that's toxic to retirement investing and capable of rapidly eroding the buying power of your retirement savings plan.

America's richest families have long combined three secret money making concepts to create their wealth - Compounding Interest, Tax Deferral and Asset Protection strategies. These secrets, when used with **Offshore Companies, Effectively Structured LLCs, Family Foundations, Trusts and Nevada entities** have been the cornerstone for creating and preserving the wealth of family dynasties.

### FREEDOM AND SELF-DIRECTION

Independently minded investors have been able to achieve *substantial returns for years*. From lease options to tax liens, investors holding special assets have flourished where the mainstream has lagged behind with neither the vision nor the knowledge to comprehend their financial deficiency.

### SELF-MANAGE YOUR MONEY

Success in investing comes from access and knowledge. Working with special assets can enable an investor to better understand the market of the investment and its potential. *Why pay someone else to manage your retirement* when you are capable of acquiring substantial retirement savings by investing in what you can know and understand?

## Fantastic Results

An innovative combined financial strategy with the use of an IRA can be an *incredible investment pairing*. Through the utilization of tax-deferred IRAs, investment earnings are able to grow at a *much faster* rate than earnings created without this tax deferred status.

### TAX FREE INVESTMENTS

When you combine the "magic" of compound interest with tax free investments, you can powerfully accelerate the rapid growth of money by investing with **pre-tax dollars**, instead of using **after tax dollars**. Below are examples of companies reporting double digit returns.

You can also achieve greater financial privacy by using your self-directed IRA and IBC in combination to help protect you from lawyers and lawsuits.

### YOUR INVESTMENT COMPANY

You can use your International Business Company (IBC) as your investment company with the only member partner being your IRA.

You become the "funds manager." Create your own "Private Bank" concept where you, not someone else, has decision control.

Use this Private Banking concept just like the professionals on Wall Street. You can even join with others and pool your investments.

## *Create Your Own "Private Bank"*

The "Private Bank" concept consists of attracting a few individuals with retirement savings, offering them attractive rates of returns, and utilizing these funds to increase your output and profitability.

Lending institutions, insurance companies, and venture capitalists have been using similar concepts for years.

By using self-directed IRAs you can utilize this concept which will allow you to become more profitable and stay ahead of inflation.

Simply move funds from your existing IRAs to a self-directed IRA, set-up the offshore International Business Company (IBC) and then move funds into your "private bank" to invest as you choose.

Earn 5% to 20% as the investment manager of your offshore company. You can participate in further profits by also being an investor. For asset protection and tax reduction, use a Nevada Corporation as the investment manager thus replacing yourself personally.

*You can move fast into any investment.*
